INTIMATE RESPONSE™

The Freedom to Change

SENSUALITY AND MENOPAUSE. FOR MANY WOMEN THIS apprehensive milestone is foreshadowed by disquieting physiological changes. Its debut marks a transition period that can actually begin at age 40. Called pre-menopause, it usually lasts 3 to 6 years and is characterized by powerful hormonal changes with wide-ranging effects on a woman's body. Her level of romantic passion is often influenced by these changes.

Source Naturals is proud to announce ETERNAL WOMAN™ INTIMATE RESPONSE™. This herbal-safe, natural formulation may support a woman's healthy vitality and vigor during pre-menopause.

Visit our web site at: www.sourcenaturals.com

Healthy Circulation = Natural Vitality.

Most women experience decreases in desire at one time or another. Activity levels, monthly hormonal changes, circulatory status, drugs such as oral contraceptives and anti-depressants, alcohol and emotional factors all may contribute to a woman's passion. However, pre-menopause is something more.

Hormones stimulate, affect and balance hundreds of processes during a woman's monthly cycle. When their levels begin to fluctuate and decline during pre-menopause, the body's internal balancing act is acutely influenced.

The bloodstream is our "river of life" as it delivers oxygen and nutrients throughout the body. Maintaining adequate blood circulation is necessary to our health and vitality.

INTIMATE RESPONSE contains these supportive herbs and nutrients: **yohimbe, epimedium, Ginkgo biloba, Panax ginseng**, and L-Arginine.

The Nitric Oxide Connection.

L-Arginine is the primary amino acid that the body uses to make nitric oxide. It is nitric oxide that helps the muscle tissues surrounding a blood vessel to relax, allowing more blood to flow to the organs.

Panax ginseng is a highly valued botanical traditionally utilized as an energizing tonic. In use for thousands of years in China, its main active constituents are the ginsenosides.

Ginkgo extract is traditionally the premier herb for supporting blood flow in the circulatory system.

Pregnenolone is the starting point from which all sex hormones are produced internally.

“Pre-menopause can actually begin at age 40...and its adverse influence on desire is one of the common experiences.”

Yohimbe is an African herb that has traditionally been used for more than 100 years. It supports peripheral blood vessels.

Epimedium and **dong quai** are highly valued blood tonic herbs in traditional Chinese medicine used to support circulation and "life essence."

Vitamin B6 and **folic acid** support proper blood flow and healthy arteries by reducing

levels of homocysteine in the bloodstream.

The Healthy, Herbal-Safe Response.

INTIMATE RESPONSE is a remarkable combination of herbal-safe, gentle ingredients that may support healthy and normal circulation during pre-menopause.

For the *freedom to change™* naturally...choose INTIMATE RESPONSE by Source Naturals.
